

Junior frontend/full-stack developer experienced in building React and Next.js interfaces and integrating Node.js and Express services with PostgreSQL, Redis, and ClickHouse. Contributed to a 10-person software project at FPT Software and shipped product features in a SaaS startup environment. Strongest in TypeScript, responsive UI development, API integration, and cross-stack debugging.

TECHNICAL SKILLS

|                          |                                                                                                                     |
|--------------------------|---------------------------------------------------------------------------------------------------------------------|
| Frontend                 | React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, shadcn/ui, Framer Motion, Zustand, Redux Toolkit |
| Backend and data         | Node.js, Express, REST APIs, PostgreSQL, Redis, MongoDB, ClickHouse                                                 |
| Web3                     | Sui, Move smart contracts, Walrus decentralized storage, Seal encryption                                            |
| AI and LLM               | Vercel AI SDK, OpenRouter, OpenAI API, Claude                                                                       |
| Infrastructure and tools | Git, GitHub Actions, CI/CD, Docker, AWS, Vercel, Railway, Figma, Turborepo                                          |
