

FRONTEND ENGINEER

Self-taught frontend engineer focused on polished, accessible web products with React, Next.js, and TypeScript. I enjoy complex UI work, thoughtful interactions, and turning product ideas into responsive interfaces.

A fast, hands-on learner who adapts quickly to unfamiliar tools and wants to keep growing through ambitious products and strong engineering teams. Available for full-time, contract, and freelance roles.

TECHNICAL SKILLS

Frontend	React (4 years) · Next.js (3.5 years) · Tailwind CSS, shadcn/ui, Framer Motion, Zustand, Redux Toolkit
Programming	JavaScript (4 years) · TypeScript (3 years) · HTML, CSS, Move
Backend & Data	Node.js (2 years) · Express (3 years) · PostgreSQL & Redis (2 years) · MongoDB, ClickHouse
Web3	Sui, Move smart contracts, Walrus decentralized storage, Seal encryption
AI & LLM	Vercel AI SDK, OpenRouter, OpenAI API, Claude
Infrastructure & Tools	Git (4 years) · CI/CD (1 year) · Docker, AWS, Vercel, Railway, GitHub Actions, Figma, Turborepo

EXPERIENCE

Fullstack Developer	at Forno	Sep 2025 - May 2026
- Designed and shipped product features for a Web2/Web3 analytics platform in a small SaaS startup team. - Built responsive Next.js interfaces and integrated them with Express services backed by PostgreSQL, Redis, and ClickHouse. - Tested releases, investigated user-reported issues, and fixed defects across the product. - Maintained technical documentation so product behavior and integrations stayed clear.		
Frontend Developer Intern	at FPT Software	Sep 2024 - May 2025
- Led the frontend internship team on FAMS, a student management application delivered by a 10-person project team. - Created the shared UI foundation and reusable templates with Next.js and React. - Managed client state with Redux Toolkit and coordinated API integration with the backend team.		

SELECTED PROJECTS

WalForm	TOP 1 · LIVE	Source
Built a drag-and-drop form builder where form schemas live as Sui objects and encrypted submissions are stored as Walrus blobs. Shipped on Sui mainnet for the Walrus Session 2 Form Tooling track.		
Tech stack	Next.js · TypeScript · AI SDK · OpenRouter · Sui · Move · Walrus · Seal	
Sui Stream	HACKATHON	Live demo
Created a responsive on-chain video streaming experience using Walrus for decentralized media storage and Sui smart contracts. Built for CommandOSS HackerHouse in April 2026.		
Tech stack	Next.js · TypeScript · AI SDK · OpenRouter · Sui · Move · Walrus	
Portfolio	IN PROGRESS	Source
Developed a typed, component-driven portfolio with interactive UI, responsive layouts, dark mode, and shared packages managed in a Turborepo monorepo.		
Tech stack	Next.js 16 · TypeScript · Tailwind CSS v4 · shadcn/ui · Turborepo	

EDUCATION & RECOGNITION

FPT University	Bachelor of Software Engineering GPA 3.08/4.00	Oct 2021 - May 2025
Awards	Top 1 - Walrus Session 2, Form Tooling track	WalForm · 2026
	Top 2 - First Mover Hackathon	Relic of Lie · Feb 2026

CERTIFICATIONS

User Experience Research and Design	Coursera · May 2024
Project Management Principles and Practices	Coursera · May 2024
Certified Ethical Emerging Technologist	CertNexus / Coursera · Sep 2023
